**MIGRATION SE PRO**

The pace of work has changed. Leading organisations are looking for ways to support highly collaborative work across diverse and cross-disciplinary agile teams. A holistic approach to the whole work environment provides work tools and settings to help teams transition between collaborative 'we' work and focused 'me' work, allowing creation and innovation to flourish at greater speed.

The foundation for a dynamic collaborative workplace is the choice and control of where and how to work. Height adjustable workstations invite postural changes to support an innovative and collaborative workforce with better wellbeing.

As work and life continue to integrate, productive work environments are welcoming, colourful and informal, with a diverse mix of soft furniture settings designed to encourage social connection and build trust between colleagues.

# Meet Migration SE Pro

Migration SE Pro is Steelcase's next generation height-adjustable desking platform. Improved performance and a wide selection of structural and technical components set a new standard in flexible dynamic planning. Its curated selection of finishes will contribute to a unique, tailored expression in the workplace.

**“The health of any organisation is dependent on the wellbeing of its most important asset – its employees.”**

**LYNNE SULLIVAN**

Director, Steelcase Wellbeing Consulting

# Designed for wellbeing

Regular movement throughout the day is known to bring benefits to the health, happiness and performance of people at work. Height-adjustable benching lets teams sit together, while individuals can take control of their own work surface height.

## Engineered for smooth transitions

Standing posture helps smooth transitions between focused and collaborative work modes. Raising or lowering the worksurface can help shift gears when changing tasks, while spontaneous interactions allow colleagues to solve problems and learn from each other.

Standing height postures are beneficial in stimulating new ideas, connections and creative thinking, as well as for eye-to-eye discussions with teammates. Brainstorming and sharing in an active posture will energise engagement.

## Plan for flexibility

With more modular freedom than ever, Migration SE Pro offers the flexibility to evolve your workplace strategy over time. Curate your own space by mixing soft settings and workstations to create a diverse work environment that suits every work mode.

# Create your own team space

Teams clustered together can share stronger connections and work more efficiently and harmoniously. Bundle Migration SE Pro desks with Diversal spine to create a dynamic team zone. By nesting collaborative worktools in close proximity to individual spaces you will support the transition from “me” work to “we” work mode.

Shielding the team with settings that help increase visual and acoustic privacy will enhance focus and define the team’s work zone, creating a sense of belonging.

## Silent and powerful

The new motor enables a smooth, seamless and remarkably silent transition between postures. The controller can also store four different posture settings, ensuring ease of adjustments.

## Advanced anti-collision technology

Re-engineered for enhanced protection of your furniture, the anti-collision sensor detects any change in angle from any point on the worksurface to rebound on contact with objects below the desk.

## Robust stability

The refined understructure is visually lighter, yet has improved structural integrity due to new connection points, that make Migration SE Pro more sturdy than ever – suitable for heavy daily use and multiple reconfigurations.

## A home for teams

Easily combined with Sarto screens, a wide range of options enable a perfect balance between workspace and privacy, helping to create an ideal home for teams.

# A quick burst of work

The Migration SE Pro 90 degree bench is a multimodal work point designed for a quick burst of work. The angled worktop, quick power and height controls enable any drop-in user to immediately focus on whatever they need to work on.

## Toggleing between Me & We

In combination with Sarto fixed screens, teams can toggle between focus and collaboration mode by raising table to standing height.

## Quick power access

Designed for a quick burst of work, worktop quick power option is available to optimise the experience for the drop in hybrid worker.

## Worktop integrated controller

The new worktop integrated controller option removes chances of collision with chair arm, positioned away from prime work areas yet always within reach.

# Collaborating in the open

The Migration SE Pro meeting table is designed mindfully to support and encourage team collaboration by leveraging the worktop geometry and providing quick access to power and height control.

## Engagement through geometry

The Migration SE Pro meeting table is designed for flexible application in enclosed or open spaces. There are four standard worktop shapes for four different types of collaborative and personal settings, each designed with a unique form to facilitate varied work activities.

## Humanised design

Centrally and visibly located height controls and power access create a dynamic, collaborative environment that is intuitive and easy for groups to use.

## Chamfered edge

Style and character are integral to creating spaces where users feel they can belong. The paint finish on the chamfered edge can be configured to provide accent, or match your space.

# Your personal cove

The 90 and 120 degree desk combines the high performance specifications of the Migration SE Pro with a flexible and robust design that provides maximum comfort and space for the user. Easily combined with a wide range of Sarto Privacy screens, users can adjust their level of privacy to create a personal cove for focus.

# Tailored expression

Creative expression injects inspiration and energy into the workplace. Choose round legs for a softer look or rectangular legs to define stronger lines.

An extended selection of worksurfaces and a fresh palette of colours also help Migration SE Pro to harmonise with soft settings in your team neighbourhoods, creating a welcoming work environment.

# Features summary

## Silent and powerful

A powerful new digital motor makes smooth, seamless, and silent transition between postures and the controller can store four different posture settings.

## Advanced anti-collision technology

The anti-collision sensor protects even light equipment from accidental knocks. A highly sensitive new mechanism detects any change in angle, from any point on the worksurface.

## Approachable design

Contoured, soft rounded curves and harmonious arcs contribute to a welcoming work environment.

## Sarto screens

For added privacy and a soft welcoming experience, shield workstations with Sarto screens in a range of colours and material finishes.

## Robust stability

The refined understructure is visually lighter, yet sturdier than ever.

## Cable management

More choice of components brings greater flexibility in cable management, with new metal cable trays or a metal and PET hybrid in a range of depths.

# Statement of Line

## Migration SE Pro linear desk and bench

Basic Range: 720-1180mm  
 Extended Range: 650-1250mm  
 Fixed Height: 720mm  
 Depth: 700, 750, 800, 900 mm  
 Width: 1200, 1400, 1500, 1600, 1800mm

## Migration SE Pro 90 degree bench

Basic Range: 720-1180mm  
 Extended Range: 650-1250mm  
 Fixed Height: 720mm  
 Depth: 1200mm  
 Width: 1200mm

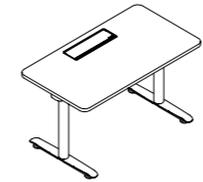

## Migration SE Pro 90 and 120 degree desk

Basic Range: 720-1180mm  
 Extended Range: 650-1250mm  
 Fixed Height: 720mm  
 Depth: 700, 750, 800mm  
 Width: 1200, 1400, 1600mm

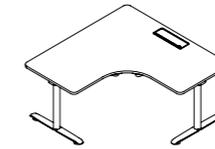

## Migration SE Pro 120 degree bench

Basic Range: 720-1180mm  
 Extended Range: 650-1250mm  
 Fixed Height: 720mm  
 Depth (2 leg): 700, 750, 800mm  
 Width (2 leg): 1000, 1200mm  
 Depth (3 leg): 700, 750, 800mm  
 Width (3 leg): 1400, 1600mm

## Worksurface
